

1. Program to print maximum among two numbers.
2. Program to print maximum among three numbers.
3. Program to check whether a given number is divisible by 3 or not.
4. Program to check whether a given number is divisible by 5 or not.
5. Program to check whether a given number is divisible by 11 or not.
6. Program to check whether a given number is even or odd.
7. Program to check whether a year is a leap year or not.
8. Program to check whether a given input is digit or not.
9. Program to check whether a given input is the alphabet or not.
10. Program to check whether a given number is a positive or negative number.
11. Program to check whether a character is a vowel or consonant.
12. Program to check whether a given character is uppercase or lowercase.
13. Program to check whether a person is valid for vote or not?
14. Write a programs to display “Hello” if a number entered by user is Multiple of 5 otherwise print “Bye”
15. Write a programs to Display Last Digit OF Number
16. Write a programs to check weather the last digit of number(Enter By user) is divisible by 3 or not
17. Write a programs to accept a number from 1 to 7 and display the name
18. Write a program to check whether a person is a senior citizen or not.
19. Accept the age of 4 people and display the youngest one.
- 20.

21. Question Given in Below Images

Q3. A company decided to give bonus to employee according to following criteria:

Time period of Service	Bonus
More than 10 years	10%
≥ 6 and ≤ 10	8%
Less than 6 years	5%

Ask user for their salary and years of service and print the net bonus amount.

22. Question Given in Below Images

Q2. Write a program to accept the cost price of a bike and display the road tax to be paid according to the following criteria :

Cost price (in Rs)	Tax
> 100000	15 %
> 50000 and <= 100000	10%
<= 50000	5%

23. Question Given in Below Images.

Q7. Write a program to accept two numbers and mathematical operators and perform operation accordingly.

Like:

Enter First Number: 7

Enter Second Number : 9

Enter operator : +

Your Answer is : 16

24. Question Given in Below Images.

Q6. Accept the kilometers covered and calculate the bill according to the following criteria:

First 10 Km	Rs11/km
Next 90Km	Rs 10/km
After that	Rs9/km

25. Write a program to input electricity unit charges and calculate total electricity bill according to the given condition:

For first 50 units Rs. 0.50/unit

For next 100 units Rs. 0.75/unit

For next 100 units Rs. 1.20/unit

For unit above 250 Rs. 1.50/unit

An additional surcharge of 20% is added to the bill

26. Write a program to input marks of five subjects Physics, Chemistry, Biology, Mathematics and Computer. Calculate percentage and grade according to following:

Percentage $\geq 90\%$: Grade A
Percentage $\geq 80\%$: Grade B
Percentage $\geq 70\%$: Grade C
Percentage $\geq 60\%$: Grade D
Percentage $\geq 40\%$: Grade E
Percentage $< 40\%$: Grade F

27. Python program to print all even numbers between 1 to 100 using a for loop.
28. Python program to print all odd numbers between 1 to 100 using a for loop.
29. Python program to print sum of all even numbers between 1 to 100 using a for loop.
30. Python program to print sum of all odd numbers between 1 to 100 using a for loop.
31. Python program to count the digits of a given number using for loop.
32. Python program to print the sum of digits of a given number using for loop.
33. Python program to check whether a given number is Prime or not using for loop.
34. Python program to print all Prime numbers between 1 to 100 using for loop.
35. Python program to find the sum of all prime numbers between 1 to 100 using a for loop.
36. Python program to check a given number is Armstrong or not using a for loop.
37. Python program to print all Armstrong numbers between 1 to n using a for loop.
38. Python program to check a given number is neon or not using a for loop.
39. Python program to check number is palindrome or not using for loop.
40. Python program to print Fibonacci series of a given number using for loop.
41. Python program to print all alphabets from a to z using for loop.
42. Python program to print all uppercase alphabets using for loop.
43. Write a programs to first 10 Even number using for loop 44. Python program to print all lowercase alphabets using for loop.
45. Write a programs to first 10 Even number using for loop in reverse order
46. Write a programs to print number from 1 to 20 except multiple 2 and 3

47. Please Solve All Pattern Programs Given in Below Images

48. s

49. a 50. d

51. Check if the temperature is greater than 30°C: If true: Print "It's hot."

Else: Check if the temperature is less than 10°C: If true: Print "It's cold." Else: Print "It's a moderate temperature."

52. Input number

Check if the number is divisible by 2

a. If true: Print "The number is even."

b. Else: Print "The number is odd."

53. Checking the Age Group

Check if age is less than 13 If true "Child"

Else if age is between 13 and 19 If true "Teenager"

Else if age is between 20 and 59 If true "Adult"

Else If true Print "Senior"

54. Simple Grading System,

Check if marks are greater than or equal to 90 If true "Grade A"

Else if marks are between 80 and 89 If true "Grade B"

Else if marks are between 70 and 79 If true "Grade C"

Else if marks are between 60 and 69 If true: "Grade D"

Else If true: Print "Grade F"

55. Determining Leap Year or Not

i. 2305

ii. 2000

iii. 1998

iv. 1900

56. W.A.P Check the Largest of Three Numbers

A=20

B=30

C=35

57. W.A.P using conditional statement check whether the given number prime or not

58.
